ANNOUNCEMENT!

The World's First and Only Carbon Balanced Sugar Cane Copy Paper Is Now Available!

CaneFields™ Eco-Friendly Paper Products Help to Preserve Forests. Sugar cane waste fiber, or ‘bagasse,’ is used to make CaneFields™ eco-friendly paper products. The use of waste keeps it from the landfill. CaneFields’ carbon neutral paper products also use renewable energy to further reduce their carbon footprint. By using agro-waste recycled sugarcane waste, bagasse, CaneFields™ eco-friendly paper products are part of sustainable development, social responsibility and natural preservation. Sugarcane paper helps to preserve forests because no tree pulp is used. Finally, a truly environmentally friendly, high quality copy paper priced for any budget.

CaneFields™ copy paper is now available on our online website at www.Earth-Centric.com or in our store located at 6017 NE Sandy Boulevard, Portland, Oregon. It can be purchased by the 500 sheet ream, the 5-ream case, or 80-case pallet. Order a ream or case today and test it out yourself!

CaneFields™ Environmentally Friendly Sugarcane Copy Paper

CaneFields™ high brightness “sugar white” multi-purpose office paper made from sugarcane waste is guaranteed for high performance in all standard business and commercial printing applications. CaneFields™ paper is endorsed by the World Wildlife Fund, the world’s largest multinational environmental organization. This premium sugarcane paper is available in 22 lb, 8½” x 11”, 92 brightness. CaneFields™ multi-functional paper is designed to meet all the printing needs of a modern office, copy center, and a commercial printer. It is ideally suited for laser, inkjet, plain paper fax and digital copiers. Through the use of our sugarcane based paper, your business will experience less calls for copier and press maintenance due to dust build-up when compared to commonly used wood fiber based papers. CaneFields papers are widely used in many world markets in business, schools, and printers of all sizes and descriptions.

Replacing just 400 reams of your standard tree fiber based copy paper with 400 reams of CaneFields eco-friendly sugarcane paper means your business will make the following differences for our environment:

- 17 - 26 trees stay in our forests
- 6000 - 8000 pounds of wood are not used
- 7000 - 9000 gallons of water are saved
- 22000 gallons of wastewater are avoided
- 17 million - 20 million BTU's of electricity are used from wind or biomass energy instead of electricity generated from coal and other environmentally hazardous sources
- 2000 - 6000 pounds of greenhouse gases avoided
- 1500 - 2000 pounds of solid waste is prevented
- 200 - 400 gallons of oil aren't used

**Ranges are based on EPA data, Environmental Defense Fund Paper Calculator data, and paper calculator data from various North American paper manufacturers. Ranges are intended to reflect widely varying manufacturing processes in order to provide conservative estimates for the purposes of comparing CaneFields papers to others.*

Sweet Spot

CANE FIELDS ENVIRONMENTAL SUGAR CANE PAPER
EARTH-CENTRIC, LLC is an Official CaneFields Sugarcane Paper Sweet Spot!

Preserving Nature, Protecting Forests, Addressing Global Climate Change

In partnership with TerraPass & CaneFields USA, Earth-Centric is proud to offer the world's first and only Carbon Balanced multipurpose copy paper to our North American customers. The ultra-low carbon footprint associated with CaneFields copy paper is reduced to zero through the use of TerraPass carbon offsets. This ensures our customers that our eco-friendly sugarcane copy paper is manufactured and delivered Carbon Balanced into our Distribution Centers and wholesale partners all around the US and beyond. Call us today and ask us about our discount program.
